SKYJET | Leader of Global
Double Side Printing Machines

Global invention patent Real multi-functional UV RTR printer

One Printer= UV single-side printer + UV single-side printer + UV double sided printer . Invest one printer could get 3 printers with full-scale printing functions of this world. It is a most valuable printer for investment whatever you are a big print shop owner or you are a new print business founder.SKYJET obtained the title of "Chinese machinery industry famous brand products" in 2017.

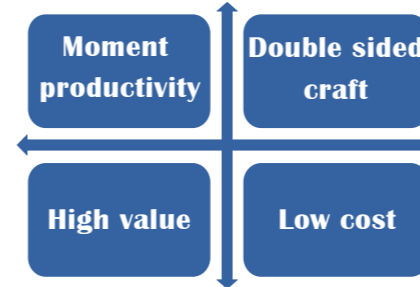

ADVANTAGES

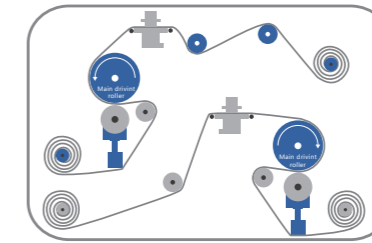

Moment productivity advantage: 4PASS+50%Mask mode, Single side printing speed could be 168sqm/hour.

Double sided printing craft advantage: Perfect craft applications are the key of opening VIP customers lock. Making perfect light box, perfect shop sign and mesh etc.Double sided print craft ink cost and time cost is same with normal print which means you have the ability to control pricing.

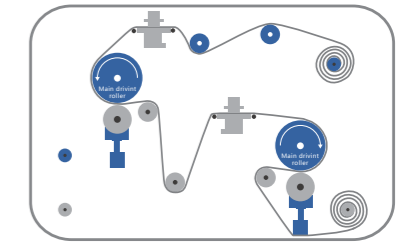

Cost advantage: One printer can do 3 printers job whatever single sided printing, double sided printing, multi-layers printing, special craft printing solution. All can save ink cost, time cost, floor cost,electricity cost, labor cost and service cost etc.

PRODUCT STRUCTURE

Route of two single printing

Double side printing route

Work as 2 printers

SDL3300 equips 2 sets of medium drive devices, printing carriages, control systems, constant tension systems and ink systems. It also works as 2 single side printers.

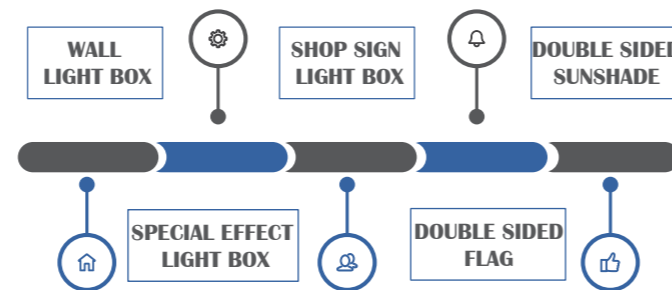

Work as 1 Double sided printer

SDL3300 uses patient media rolling system. It can print same and different images on media, 100% alignment resolution. Solve the problem of light box color difference at daytime and night.

PRODUCT CONFIGURATION

- Heavy Duty Frame :** Heavy duty double sided designed frame, 230MM diameter roller.
- Print Functions :** Single side printing mode, Double sided printing mode, Color +white+color mode,Muti-layers printing mode. It can satisfy all your imagination.
- Constant tension media rolling system** keeps media rolling perfect and ensure perfect alignment resolution.
- Constant temperature water-cooling platform** can keep platform resolution be 0.1mm and print 4P words better clearness.
- New designed software** can be composing after RIP and also can use different ICC curve for different file in same print process.Saving 30% working time.
- PLC central control** makes printer working stability and promoting work efficiency.
- Color management software :** CALDERA Grand RIP, ICC color adjustment function.
- Print Log** writes print data automatic which is easier to know the print cost.

Double sided Application

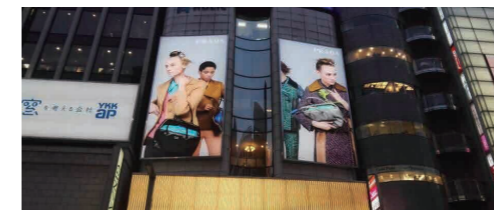

3 SPECIAL EFFECT LIGHT BOX

- Day&Night effect, The light box is more positive and charming at night. Dynamic technology perfect solution.

1 WALL LIGHT BOX

- Most of wall light boxes made by the art of "double ink volume" and the effect is dark and different status at daytime and night, but Double sided printing solves the problem.

4 DOUBLE SIDED FLAG

- One time 100% alignment double sided printing solution to save cost and time.

2 SHOP SIGN LIGHT BOX

- Most of shop light boxes are using soft film, but its cost is high and there is joint trace if length is over 1.2meters. Double sided printing can perfect replace this kind of craft.

5 DOUBLE SIDED SUNSHADE

- Single color could not meet customers decoration needs.Double sided craft can perfect meet customers needs of special LOGO,full color and content.
